

Technical Data Sheet

Symetry

Identification

Trade Name: Symetry

Synonyms: Symmetry Paver

Uses

Concrete pavers Symetry is in various colors for both artwork designs and corresponding field pavers. Common uses: walkways, patios, decks, plazas, outdoor showers, pool sides.

Composition

Made of cast concrete Portland cement and aggregates, usually sand and fine gravel for high density paver, with additives or without additives. Our colored pavements are not painted and are produced by us through a special process of pigmentation that provides color.

Dimension

Concrete paver may be produced with hollow centers to reduce weight or improve insulation. Each piece covers an area of .30 (43.63 sq in) square feet. The palette contains 180 units, covering approximately 54 square feet at the rate of 3.33 pieces per square foot.

Compliance

The concrete masonry unit testing laboratory performing is evaluated in accordance with practice ASTM C 140.

Sample No.	Weight [Lbs.]	Compressive Strength [Lbs.]			Absorption				
		Lbs.	Psi	Average	Wsunk	Wssd	Wdry	%	Average %
1	8.15	207,540	4,451	4,563	4.61	8.34	8.00	4.25	4.43
2	8.30	211,680	4,540		4.65	8.45	8.10	4.32	
3	8.20	219,040	4,697		4.71	8.43	8.05	4.72
